SYNCHRONOSS TECHNOLOGIES JAPAN

IT Support | QA Tester

- Assisted in the development of a new RCS messaging platform '+Message' for KDDI/Docomo/SoftBank.
- Translated and proofread technical design documents into English.
- Communicated closely with the development team to develop effective test strategies and recognize any potential risks ahead of time to meet the schedule.
- Designed test cases and executed various tests to ensure the new product satisfied the specifications and requirements from the customers.
- Identified and reported bugs and defects in the new system.
- Used tools and scripts to perform and validate the migration process from Postgres database to Cassandra database.
- Analyzed server logs and captured network packets using tcpdump and wireshark.
