LC-JAPAN

Lead Web Designer & Developer | SE Support

- Managed and directed web projects, assuming a leadership role in planning project roadmaps and delegating tasks to team members. Monitored task progress, facilitated review meetings and ensured timely completion of deliverables.
- Designed and developed custom WordPress themes, landing pages and updates while employing techniques to enhance user experience. Performed regular maintenance and updates of 14 existing websites, ensuring optimal performance and functionality.
- Implemented new features & tools, created presentations and provided training to clients and the team.
- Leveraged Python to develop scripts that automated repetitive tasks and conducted web scraping for valuable customer information, including URLs, emails, and phone numbers. This led to a significant 50% increase in customer procurement.

SYNCHRONOSS TECHNOLOGIES JAPAN

IT Support | QA Tester

- Assisted in the development of a new RCS messaging platform '+Message' for KDDI/Docomo/SoftBank.
- Translated and proofread technical design documents into English.
- Communicated closely with the development team to develop effective test strategies and recognize any potential risks ahead of time to meet the schedule.
- Designed test cases and executed various tests to ensure the new product satisfied the specifications and requirements from the customers.
- Identified and reported bugs and defects in the new system.
- Used tools and scripts to perform and validate the migration process from Postgres database to Cassandra database.
- Analyzed server logs and captured network packets using tcpdump and wireshark.
