LC-JAPAN

Lead Web Designer & Developer | SE Support

- Lead and managed web projects. Planned project roadmap and assigned tasks to each member while keeping track of progress and arranging review meetings.
- Designed and developed custom WordPress themes and performed regular maintenance and updates for 11 existing websites.
- Provided presentations and training for implementation of new features & tools to clients, as well as to the team.
- Developed python scripts to completely automate repetitive tasks, as well as scrape the web for valuable information of potential customers (urls, emails, phone numbers, etc...), leading to 50% increase in customer procurement.
- Troubleshooting network and hardware issues.
- Performed onsite and offsite repairs, upgrades and setup of PCs & printers.

SYNCHRONOSS TECHNOLOGIES JAPAN

IT Support | QA Tester

- Assisted in the development of a new RCS messaging platform '+Message' for KDDI/Docomo/SoftBank.
- Translated and proofread technical design documents into English.
- Communicated closely with the development team to develop effective test strategies and recognize any potential risks ahead of time to meet the schedule.
- Designed test cases and executed various tests to ensure the new product satisfied the specifications and requirements from the customers.
- Identified and reported bugs and defects in the new system.
- Used tools and scripts to perform and validate the migration process from Postgres database to Cassandra database.
- Analyzed server logs and captured network packets using tcpdump and wireshark.
